

# IDENTIFICATION CHART

**THIS CHART** is provided as a companion to "Aetheric Beings," the second pamphlet in the Camelopard Series, a course of study for aspiring mentalists. Presented here are sketches of each of the entities discussed, in scale one to the next. An average human male, standing 6' in height, is depicted here for your reference.

*A Caveat:* This chart is provided to act as a rough guide to the various intelligences that may be encountered in the astral, elemental, and elysian worlds, their appearance, and relative size. It has been compiled from a combination of experiences and anecdotes reported by those who have visited the worlds. It is not to be used to refute your own encounters with such beings.

What efficacy this chart does possess is only guaranteed for reference in the material world. Travelers are discouraged from using aetheric versions of this chart outside the material world, as the representations of the aetheric beings may shift.

Framed copies of this chart are available for purchase. For price and availability, and for a current catalog of pamphlets available through Wonderella Printed, please inquire in writing to the publishers at the address below.
